I'd like to be on record as opposing the warehouses and garbage station projects on Schutt Road.

The town has already approved highly industrial sites like the gas plant on Route 6 and the power station at the intersection of Route 6 and 17M. Both of these sites are close by the proposed project site and none of them are aesthetically pleasing. This area comprising Middletown/Wawayanda needs more green space, pedestrian amenities, and tree plantings going right up to the railroad crossing on Dolson and on james p. kelly way. (not sure where wawayanda begins) Perhaps Wawayanda and Middletown could work as partners to achieve those goals.

Thanks for your attention.

Fred Zanetti
Middletown NY
