I strongly oppose the plans for a solid waste management facility to be built on the Dolson Avenue side of Schutt Road. This would negatively impact our quality of life by increasing traffic and air pollution, as well as deter people from using the new and unfinished heritage trail that runs directly along this land. We already have poor air quality in this area, and this plan would only increase air pollution, as well as noise pollution. The area wetlands need to be protected to help the endangered species as well as being a natural fighter to climate change. I cannot believe that this idea has even gotten to this stage. It seems like our elected officials do not care about the quality of life for their constituents. For the above reasons the Dolosontown corridor should be declared a wildlife preserve.
