My name is Fred Isseks. I am a lifelong resident of the City of Middletown.

I oppose the Marangi project, as well as the warehouse projects, proposed for Dolsontown Road.

I object because your disingenuous impact statements demonstrate your bad faith effort to push these projects through.

It is prima facie corrupt. Local officials with integrity would not have let this project proceed to this point, nor would they subject their residents and neighbors to such blatant environmental abuse.

Orange County has a long history of illegal dumping that involved organized crime connected haulers and politicians who were either too corrupt, incompetent, or scared to death to stop them.

The combined projects on Dolsontown Road appear to fit right in to that sordid history.
