---

to whom it may concern,

I, Chloe hall, am a concerned citizen of Middletown, New York. All of my life I have lived in the area code of 10940-10941, appreciating the raw beauty and tranquility of the land I am blessed to call home. i have known for a few months of the planned industrialization of the dolson corridor in Middletown. It breaks my heart to know that schutt road, a road I have used for 21 years and have known as beautiful untouched fields may see the same fate that much of the surrounding area has. To be destroyed and built upon for the money of the big people and to take away from the little people, to make the little people suffer from the affects of it. The little people are the community…. The community that makes Middletowns personality and attraction what it is! Not only will the little people suffer from the pollution, disruption, and industrialization of this project but the ones without voices will suffer even more greatly. The wild animals , the plants, the insects and even the bacteria will all be negatively impacted by destroying the habitat that is rightfully theirs. these species have already been kicked out of home they have called theirs for thousands of years and it is only getting worse. They aren't able to get up and move away like humans can. Often I see wild life in this area suffer from human kind, I see plastic on them, their heads stuck in jars, them searching for food for their babies as they are surrounded by roads and sidewalks. It is a devastating sight, but you can help better their life by stopping further un needed building and demolition of their homes. we all deserve a good life, even the ones that can tell us they do. Please please please look into ending the talked of plans to destroy a beautiful habitat and protected wet lands that so many benefit from.
