Subject: Letter to PLANNING BOARD
Date: Tuesday, July 26, 2022 1:09:52 AM

How can you prove that all the board members sat down and read every single word in that DGEIS, because it so long and convoluted and full of obvious errors, that anyone who takes the time to go through the whole thing word by word must have noticed some evidence of inaccuracy. They must also have a lot of time on their hands, and if they are getting paid use their time to do this sort of thing, we want to receive a written summary of what the board thinks about the entire DGEIS, validating the fact that they went through it thoroughly. We don't want only the perspectives from the applicants and what their lawyers have to say. We want to hear what the board has to say. Will the board appease the public and hold a testimony of their own accounts regarding the DGEIS?

Sorry its late but our lives are busy already as it is without opposing this, and I'm sorry but I work late protecting and rescuing people in our communities, and I take my job seriously as I'm sure you all do too, so on equal ground, person to person, community member to community member, protecting and serving please accept my late night comments. Although my longest email was certainly in before the stroke of midnight, I still have more to say.

We want a visual impact analysis for the heritage trail, we want impact reports on the housing developments within reach of the site, we want the impacts of this project to be cumulatively considered along with CPV. Please make this happen. We request Marangi offer free services to every resident in Middletown and Wallkill if approved, we want to bring our trash there free of charge if it is built. If approved we want Marangi and RDM to donate a percentage of each quarter's profits to the homeless shelters, humane societies, community outreach groups, environmental justice organizations, nursing homes, rehabs, food pantries and local business' in the City of Middletown, as well as rewilding the numerous vacant blacktopped areas and unused commercial spaces to offset their impact on our environment. RDM should be restricted from buying any more land in Wawayanda before knowing exactly who they are renting to. They come here from New Jersey and ruin our culture and our environment. They destroyed all their spaces in NJ and they are coming for ours, we don't want them and we don't need them.

Just do the right thing. We're tired of fighting your negligence,we're tired of being taken advantage of, we're tired of poor air, we're tired of flooding, and habitat loss, and heat waves, and ecosystem destruction, and poor water, and terrible traffic, and biased corrupt decision making, corporate greed, out of state companies ruining our way of life, and mostly we're tired of the lies. You've been contacted by so many people, all walks of life, the senator, the mayor, the innocent community member, the single moms, the overworked men and women, the activists, the teachers, the business owners, the sheriff's department, the list goes on. NO ONE WANTS THIS PROJECT HERE, LISTEN TO US. We're supposed to be a team, protecting our heritage and way of life, and you all are acting as if you aren't part of us. We NEED this board to be the brave, honest, trustworthy men your parents raised you to be, and we know that you are deep inside your hearts. You're good people, but only if you act on your gut and listen to the members of your community. You all know this is wrong. Please act wisely. We are tired but we are not done fighting for what is right, and if you continue to act with such blatant disrespect we will continue to call you out.

-Skyler Sumner, Norma Jean Martine and everyone at Soulstainable NY
