Dera planning board members,

I am writing this letter in opposition to the proposed transfer station project located in the Dolsontown corridor. It will negatively impact the health and safety of a community that is already considered a sacrifice zone.

Projects like this mirror the many others that have come before it. Compressor stations, CPV, battery smelting plants and the most recent increase in warehouse development sites already contribute to the detriment of our community.

As resident of this county for all of my 45 years and a very close neighbor to Wawayanda, I urge you to reconsider the approval of this facility.

Just because you CAN build something, doesn't mean you SHOULD.

People before profit.

Respectfully,
Jared M. Quattrini
