Dear Members of the Wawayanda Planning Board:

I have been disturbed by the proposal to approve the Dolsontown Garbage Station in the Dolsontown Corridor. The natural wetlands and the entire environment is in danger. This is the first step in turning the entire corridor into an industrial area.
For the sake of the environment,, the future for our children to live safely in our beautiful Orange County, without undue pollution and the disastrous health effects it would bring, DO NOT APPROVE THIS PLAN.

The benefit is for the profit of large corporations at the expense of the citizens and community,
Sincerely,
Joyce Bressler
